

## ACAMP Seminar Series

ACAMP is proud to present the ACAMP Seminar Series, a series of quarterly technology commercialization events aimed at bringing together Alberta's innovation community. Designed, hosted, and launched in 2009 by ACAMP, this innovative seminar series covers the following market sectors: Cleantech, Health and Medical, Conventional Energy and Unmanned Vehicles.

ACAMP (Alberta Centre for Advanced MNT Products) is a not-for-profit organization that provides specialized business services to MNT clients including Marketing & Business Development, Product Development, and Packaging and Assembly.

### Seminar Focus: Emerging Pipeline Technologies

Emerging Pipeline Technologies are driven by the growth in energy delivery from new pipelines and older pipelines world wide. With an eye towards the need for the safest, most reliable and most efficient way possible to deliver energy, new opportunities incorporating sensors, remotely and autonomously controlled mechanical systems, passive and active monitoring systems, remote inspection, leak detection and pipeline protection are now becoming available.
