

ACAMP Seminar Series

ACAMP is proud to present the ACAMP Seminar Series, a series of quarterly technology commercialization events aimed at bringing together Alberta's innovation community. Designed, hosted, and launched in 2009 by ACAMP, this innovative seminar series covers high growth application and market opportunities.

ACAMP (Alberta Centre for Advanced MNT Products) is a not-for-profit organization that provides specialized business services to MNT clients including Marketing & Business Development, Product Development, Packaging & Assembly, Manufacturing, and Test & Characterization.

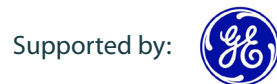

Seminar Focus: Smart Cities - Driving a New Economy

Industries related to the creation and building of "Smart Cities" are seeing significant growth in Alberta, throughout Canada and all over the world. Innovative and creative applications of existing and new technologies are continuously being integrated and evolved thereby fostering new economic growth opportunities.

Industry Insights

Smart Cities are innovative, conceptual, and city-wide technology-human-infrastructure integration platforms. Attend this seminar to learn more about existing and "needs to be developed" technologies that can and will make up the infrastructure of the ever evolving Smart City. Learn about those ideas which can promote and prioritize the use of information, sensing and communication technology, manufacturing efficiency, construction and economic development of a Smart City, while maintaining environmental sustainability.
